

JAGMINI

An ISO 9002 Company

Jagmini Micro Knit Private limited is a 100% export oriented unit set up in 1994 for the manufacture of high quality knitted cotton socks.

Jagmini's motto and challenge is to provide high quality socks with value addition. To maintain consistency in our quality commitments, we implemented TQC system as envisaged in the ISO principles and successfully acquired ISO-9002 accreditation.

" We are committed to customer satisfaction by providing consistent quality products at affordable prices through continuous improvements in our activities and skills."

JAGMINI

- D. M. Gupta.

Jagmini Micro Knits
Pvt. Ltd.

The company has entered into joint venture with reputed Japanese sock' s company M/S. Tokyo Kutsushita Company, Japan, having world-wide business establishments. M/S. Tokyo Kutsushita Co. Ltd., has been buying socks from us in large volume from last 5 year so to further expand business activities with us, they had entered into a joint venture with capital participation.

Mr. D.M. Gupta,
Managing Director
of JAGMINI
shaking hands with
Mr. N. Yamada,
President of Tokyo
Kustsushita Co.
Ltd., on the
occasion of joint
venture ceremony.

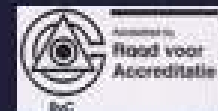

JOINT
VENTURE

The company has obtained ISO 9002 certificate with Accreditation from "JAB" (Japan) , "ANSI-RAB" (U.S.A.) , and "RvC" (Netherlands) .

ISO 9002

Presently major production is being exported to Japan meeting their toughest quality standards, and sizable quantities are also exported to Netherlands, Germany, Finland, Denmark & Russia.

Further our socks are marketed by reputed Japanese and European Brands such as " YSL, LANVIN, LABONAL, JPS, NINO PACOLI, K. SHIMA, HENRY BENEFY, JAGLAN CLAUDIO, JOHN HAILEY & RAINBOW" .

Japanese 200N single cylinder machines,' Nagata' ,form the core of the knitting department. These single cylinder machines are computerized, and the number of patterns that can be generated are unlimited.

We also have a few Japanese mechanical machines for plain and self-design socks. Computerized designing systems are used to generate the patterns for the knitting machines.

DESIGNING

HAND LINKING

The entire production is hand linked to give the most smooth feeling and qualitative look. We also have Automatic Italian sewing machine, ' Rosso' to cater to the individual customers requiremen and also for children socks.

EMBROIDERY

A Japanese make, 20 head Embroidery machine - ' Barudan' to produce rich embroidered socks with value addition, for the customer.

STEAM SETTING

Automatic rotary steam setting machine to stabilize the sock's fibers at high steam pressure and maintaining size and shape, thus providing excellent appearance.

Individual socks are checked before pairing to ensure total quality control.

PAIRING

LABELLING

After careful inspection during the pairing process the socks are folded and labels are stitched using automatic labeling machines

PACKAGING

We offer wide range of packaging as per the requirements of our valued customers. This work is done within the company to ensure guaranteed quality.

CHECKING

A Japanese metal detecting machine ensures removal of minute metallic particles/powder, not visible to naked eye, ensuring total safety to the customer.

INSPECTION

Stringent quality norms are maintained at each level of operation and every socks is checked at various inspection stages.

QUALITY CONTROL

Quality specifications are well documented and understood by all the workers. This is continuously monitored by Japanese Technical experts.

PRODUCT RANGE

We manufacture a wide range of socks in a variety of yarn combinations, for a number of reputed brand labels. We also manufacture socks by special chemically treated yarn as required by our potential buyers.

Using mercerized or combed cotton in fine counts. 90% ~ 100% cotton socks are manufactured in point designs or subdue all over design.

COTTON

COTTON

Using Cotton yarn on surface with stretch Nylon plating inside. These socks give added stretch ability to the wearer. The cotton percentage varies from 60% ~ 80%

COTTON / NYLON

These socks are made of high quality combed cotton yarn and if required can be treated with anti-pilling chemical.

WOOLLENS

Our wool blend of 20% ~ 80%, provides comfortable winter wear socks with shrink resistance in variety of dark colors.

WOOLLENS

LYCRA SUPPORT

For customized requirement & greater value addition, we knit socks with lycra support for ultimate wearing comfort with great stretchability.

LYCRA SUPPORT

MESH DESIGN

For light wear in summers, fine mesh socks are knitted with 100% Cotton yarn & also with Blended yarn.

For the conventional business look, wearing plains in mercerized cotton is still considered the best. For a rich look & greater comfort we use mercerized cotton in fine counts .

PLAIN S

PLAIN S

RIBS & LINKS

For the conventional business look, wearing plains in mercerized cotton is still considered the best. For a rich look & greater comfort we use mercerized cotton in fine counts .

DESIGN

For the conventional business look wearing plains in mercerized cotton is still considered the best. For a rich look & greater comfort we use mercerized cotton in fine counts .
